INSTRUMENTS AND EXPERIMENTAL TECHNIQUES
Volume 14, Numbers 1-6, 1971
(A translation of Pribory i Tekhnika Éksperimenta)

Volume 14, Number 1, Part 1 January-February, 1971

	Engl.	Russ.
Semiconductor Electrometric Amplifiers (Review)—A. K. Osipov	1	7
NUCLEAR EXPERIMENTAL TECHNIQUES		
Formation of Complex Magnetic Cycles in a 7-GeV Proton Synchrotron—I. F. Kleopov and G. I. Kugushev	12	19
Stabilization of the Instantaneous Intensity of the Gamma Radiation of a Synchrotron Relative to the Synchrotron Radiation—V. A. Vizir and M. M. Nikitin	18	25
Acceleration of Multiply Charged Ions in Sectioned Tubes with Inclined Fields —A. N. Serbinov	20	26
High-Intensity Beam of Negative Particles Having a Momentum of 10 to 16 GeV/c —N. I. Golovnya, M. I. Grachev, K. I. Gubrienko, E. V. Eremenko, V. I. Kotov, V. S. Seleznev, and Yu. S. Khodyrev	23	29
Current Configurations Which Ensure Rapidly Decaying Axisymmetric Magnetic Fields —S. V. Lebedev	26	32
Superconducting Quadrupole Lens—V. L. Vasil'ev, G. V. Trokhashev, V. F. Tikhomirov, and G. F. Churakov	30	35
Source of Negative Helium Ions for a Charge-Exchange Electrostatic Accelerator —Yu. M. Khirnyi and L. N. Kochemasova	33	37
Source of Polarized Negative Deuterium Ions for a Charge-Exchange Electrostatic Accelerator —Yu. M. Khirnyi and L. N. Kochemasova	36	39
Field-Emission Gun for a Linear Electron Accelerator—B. Yu. Bogdanovich, R. M. Voronkov, V. F. Gass, and V. A. Danilichev	42	44
Cathodes Used in the Guns of Linear Accelerators—K. P. Rybas, V. K. Pavlov, and G. A. Babin	45	46
Measurement of the Energy of Electrons from the Number of Shower Particles in the Region of the Shower Maximum—A. F. Dunaitsev, Yu. I. Ivan'shin, D. B. Kakauridze, I. I. Karpov, A. K. Mestvirishvili, B. A. Morozov, A. I. Saraikin, and A. A. Tyapkin	47	48
Unit for Automated Recording of Conversion-Electron Spectra—V. A. Morozov, T. M. Muminov, V. I. Razov, and V. I. Stegailov	50	51
Method of Determining the Coordinates of a Spark from the Depth of the Spark Chamber —S. M. Korenchenko and K. G. Nekrasov	53	54
Possibilities in Principle of Improving the Time Properties of a Spark Chamber—G. A. Leksin and V. K. Sokolov	55	55
Use of Thin Organic Films in Nuclear Physics Experiments—I. Ya. Barit, Yu. G. Balashko, L. S. Dul'kova, and V. P. Zavarzina	58	57
Electromechanical Drive for a Microscope Table—N. D. Zaita and M. A. Kuz'michev	62	61
Semiautomatic Microscope for Geometric Measurements in Nuclear Photoemulsions —N. D. Zaika, M. A. Kuz'michev, and N. Ya. Rutkevich	65	63

	Engl.	Russ.
Gas Differential Cerenkov Counter Having Dispersion Compensation—Yu. B. Bushnin, Yu. P. Gorin, S. P. Denisov, S. V. Dontskov, A. I. Petrukhin, Yu. D. Prokoshkin, D. A. Stoyanova, and R. S. Shuvalov	67	65
Spherical Proportional Counter Filled with ^{3}He—V. I. Korolev and A. K. Savinskii	71	68
Unit for the Continuous Pumping of Gas Through a Proportional Counter under a Proportional Pressure—Yu. I. Bregadze and P. F. Maslyaev	73	70
Shape of the Line of a Gas Spherical Proportional Neutron Counter Having a Filler Containing Hydrogen—L. S. Andreyeva, V. I. Korolev, A. K. Savinskii, and I. V. Filyushkin	75	71
Light Collection in Scintillators Having a Large Volume—V. T. Baranov, V. S. Zhukov, S. V. Samylov, I. V. Sanin, and E. A. Skvortsov	78	74
Investigation of the "Plateau" Mechanism of Scintillation Counters Using the Method of Differential Spectra—G. A. Kilbal'chich and Yu. A. Tsirlin	79	75
Measurement of the Time of Flight and Coordinates in a Scintillation Counter 130 cm Long—R. G. Astvatsaturov, I. F. Kolpakov, V. A. Smirnov, and N. N. Khatchaturyan	82	77
Hodoscope Based on Miniature FÉU-85 Photoelectron Multipliers—A. P. Bugorskii, A. A. Borisov, and S. B. Nurushev	86	80
Instrument Containing a Set of Low-Efficiency Greiger Counters for Measuring the Linear Energy Transfer Spectra of Gamma-Neutron Radiation—I. V. Keirim-Markus, A. Ya. Kushnerev, and V. I. Popov	89	82
Raising the Sensitivity of Measuring the Dosage Power of Ionizing Radiation —R. Ya. Strakovskaya and V. A. Shesterikov	94	88
ELECTRONICS AND RADIO ENGINEERING		
Data Acquisition System—V. B. Aleshchenkov, N. P. Grigorenko, V. A. Gulyaev, L. A. Matalin, and A. S. Tishechkin	97	89
Optimal Coding of the Multiplicity of Coincidences and the Numbers of Inputs into the Amplitudes of a Pulse—B. G. Mishchenko and N. S. Trushkin	102	94
Block Containing an Analog-To-Digital Converter with a Counter Based on Integrated Microcircuits and Luminous Indication—N. M. Nikityuk, V. Popel'skii, and V. N. Semenov	106	96
Analog-to-Digital Converter Based on Integrated Microcircuits—N. M. Nikityuk	112	102
Digital Indication of Pulse Counters Based on Integrated Circuits—V. S. Gutnikov, M. I. Lerner, and A. G. Ryzhevskii	116	105
Nanosecond Circuits for the Protection of Linear Semiconductor Networks from Amplitude Overloads—V. E. Zavodnik and B. G. Mishchenko	118	107
Digital Precision Pulse Generator—N. K. Lastochkin, V. N. Inzhevatov, and E. E. Yakovlev	121	109
Pulse Generator Producing a High-Power Current—A. M. Andrianov, V. F. Demichev, G. A. Eliseev, P. A. Levit, A. Yu. Sokolov, and A. K. Terent'ev	125	112
Symmetrical Strip Line for Shaping Powerful Microsecond Pulses—V. V. Shaknov	127	114
Initiation of a Discharge in a Megavolt Gas Spark Gap by an Electron Beam —E. A. Abramyan, V. V. Borob'ev, A. A. Egorov, V. A. Elkin, and A. G. Ponomarenko	130	117
Electrodes for High-Current Commutators—Yu. S. Pavlov and S. A. Smirnov	132	120
Excitation of Powerful KIU-12 Amplifier Klystrons—M. B. Vladimirtsov, B. V. Prosin, and S. A. Chernyi	135	121
Coaxial Tape Resistor—V. V. Shakhov	138	123
Selective Transistorized Amplifiers for the 0.1-100 kHz Frequency Range —M. V. Komar and V. E. Yamnyi	140	124
Transistorized Selective RC-Amplifiers with Tuning of the Resonant Frequency —V. V. Maslenikov and V. A. Merkulova	142	126
Low-Noise Preamplifier for Ge(Li) Radiation Detectors—Yu. G. Panitkin	146	129

Separation of the Noise from a Pulse Generator and a Spectrometric Preamplifier —V. P. Selyutin and A. A. Il'in 148 130
Meter for Measuring the Noise Factor of Two-Ports—L. P. Karba, Yu. S. Karpov, and G. S. Porovskii 150 132
Relaxation Oscillator Based on a Semitron—Yu. B. Soltamov and V. I. Smirnov 153 134
Stable Frequency Modulator Based on Varicaps—V. E. Korepanov and V. G. Barsukov 154 135
Broadband Frequency Doubler Based on Semiconductor Triodes—B. M. Bogdanovich and G. P. Presnyakov 156 136
Method of Measuring Phase Difference Using Double Frequency Conversion —A. M. Vishnevskaya and B. V. Prosin 161 140
Passive Shaping of Electrical Signals Having a Complex Waveshape by Means of an Optico-Acoustic Device—Yu. V. Andreev, V. A. Volokhatyuk, R. R. Krasovskii, V. S. Larionov, and R. I. Ryabukha 164 142

Volume 14, Number 1, Part 2 January-February, 1971

Comparator Based on Integrated Circuits—V. D. Kozlov 167 144
Output Network with a Commutator for Multichannel Instruments—B. B. Makovoz and M. A. Sokolov 169 145
Display of Processes in Multichannel Recorders—G. A. Gumenyuk 172 148
Electromechanical Integrator—V. A. Kolbasov, V. P. Nazarov, and E. P. Yudin 175 150
Correlator for Investigating Random Processes in a Plasma—V. A. Rodichkin, G. A. Serebrenyi, and A. M. Timonin 177 151
Coherent Pulse Spectrometer for Nuclear Quadrupole Resonance of ^{14}N—I. A. Safin and D. Ya. Osokin 180 154
Sensitive Relaxation Oscillator Based on a Secondary Emission Tube—I. A. Anarbaev, I. I. Gofman, and V. V. Ivanovskii 183 156
Block of Pulse Programs for a Nuclear Magnetic Resonance Echo-Relaxometer —B. V. Kuznetsov 187 157
Dynamic Method of Measuring the Q of Microwave Resonators—I. M. Buzin 188 160
Network for Automatic Recording of Volt-Ampere Characteristics—G. L. Brusilovskii, V. A. Silin, I. A. Kartuzova, and Yu. G. Shishkin 190 162
Protection of a System of Electronic Modules from Changes in Power-Supply Voltage —L. S. Khurshudyan 193 164

GENERAL EXPERIMENTAL TECHNIQUES

Three-Dimensional Quadrupole Mass-Spectrometer with Ion Storage—É. P. Sheretov, V. A. Zenkin, and O. I. Boligatov 195 166
Combination of a Chromatograph with a Mass-Spectrometer—A. N. Aleksandrov, A. S. Rabinovich, S. L. Skop, and S. A. Gorbacheva 198 169
Modification of the MI-1305 Mass-Spectrometer for Operation as a Chromatograph Detector—N. I. Vykhrestyuk, A. P. Lizogub, and Yu. A. Slupitskii 200 170
Large High-Vacuum Joints—A. V. Balitskii, L. A. Filatovskii, and A. S. Shuvalov 205 175
High-Speed Gas Valve—N. F. Vladimirov, V. S. Komel'kov, and V. I. Modzolevskii 207 177
Sorption of Gases by an Oxide Film on Aluminum—V. V. Kosherov, E. N. Martinson, and A. I. Shal'nikov 210 180
Miniature Source of Dense Streams of Neutral Particles—V. B. Yuferov, E. I. Skibenko, A. M. Il'chenko, M. Yu. Bredikhin, and A. I. Maslov 214 183
Automatic System for Recording the Work Function in the Field-Emission Gun Method —G. N. Freiberg 217 185
Protection of the Electrodes of an Ion Gun from Disintegration During Vacuum Breakdowns —V. F. Kuzovlev and M. M. Bachmanov 221 188

Radiation Properties of a Photomultiplier in Steady-State Gamma-Fields—A. M. Lyutsko, Nguyen Kuang Minh, A. N. Pertsev, A. I. Pokryshkin, Zh. M. Ronkin, and M. B. Satsunkevich	224	190
Investigation of a Photomultiplier as a Measurement System Which Is Almost Linear —É. A. Narusbek	227	193
Electromagnetic Modulation of the Current of a Photomultiplier—I. V. Krinskii, I. S. Nikolaichuk, A. V. Polyakov, and É. N. Shumilov	229	195
Improving the Threshold Sensitivity of a Photomultiplier by Means of an External Electromagnetic Field—Yu. V. Popov and B. I. Utenkov	231	196
Investigation of Powerful Semiconductor Lasers with Electronic Excitation —A. N. Mestvirishvili, A. S. Nasibov, A. I. Svinenkov, V. I. Perevodchikov, A. L. Fedorov, and K. A. Yumatov	234	199
Use of Pyroelectric Receivers for Measuring the Radiation Characteristics of Giant Laser Pulses—L. S. Kremenchrugskii, P. P. Pogoretskii, E. N. Sal'kova, M. S. Soskin, A. G. Chepilko, and A. Ya. Shul'ga	238	202
Use of a ZIS-1 Image Converter for Streak Raster Photography—V. N. Ishchenko, V. N. Starinskii, and M. F. Stupak	241	205
Thermostat for Optical Measurements—A. G. Dmitriev, B. V. Tsarenkov, and N. G. Chiabrishvili	244	207
Unit for Investigating the Effect of Infrared Radiation on the Rate of Chemical Processes —V. M. Tul'chinskii and S. M. Chernin	246	208
Buffing Lightguides and Viewing Windows Made of Plastics—N. S. Shatlovskaya	250	212
Automatic Demagnetization of the Magnets of Beta-Spectrometers—M. I. Babenkov and L. A. Basin	253	214
Stand for Physical Investigations in the Magnetic Field of a Superconducting Solenoid —V. E. Keilin, E. Yu. Klimenko, and B. N. Samoilov	255	216
Laboratory Piston Compressor with a Hydraulic Drive for the Compression of Inert Gases —S. M. Stishov and A. F. Uvarov	258	218
Method of Impulse Stressing of Crystals—V. V. Korshunov, F. D. Senchukov, and S. Z. Shmurak	261	221
Cavity Resonator for Electron Paramagnetic Resonance Investigations at Pressures of Up to 8 kbar and Liquid-Helium Temperatures—T. I. Alaeva, L. F. Vereshchagin, S. V. Kasatochkin, Yu. A. Timofeev, and E. N. Yakovlev	264	223
Unit for Metallographic Investigations at 4.2-300°K—M. V. Zinov'ev, L. K. Kolybaev, and V. A. Moskalenko	266	225
Measurement of the Pyrocoefficient in the 40-600°C Temperature Range —N. F. Karyakina, V. K. Novik, and N. D. Gavrilova	269	227
Estimating the Time Resolution of Stroboscopic Electronic Microscopes—I. S. Kolotov and O. S. Kolotov	273	230
Efficiency of Recording Longwave X Radiation by Means of Scintillators—V. R. Al'perovich, N. B. Grinberg, N. I. Komyak, L. Ya. Morgovskii, and B. T. Plachenov	275	232
Measurement of the Junction Resistance of Ohmic Contacts with Thin Semiconductor Layers—V. Ya. Niskov	278	235
Resolving Power of the Method of Measuring the Resistivity from the Leakage Resistance of a Metal-Semiconductor Contact—Yu. P. Boitsov and V. I. Prokhorov	281	237
Absolute Calorimeter which Operates in the Heating and Cooling Mode—E. L. Kiziriya and E. Yu. Roinishvili	285	241
Low-Temperature Microscales Having a Sensitivity of 10^{-7} g—V. S. Kogan, V. B. Rabukhin, and Yu. M. Chernyak	289	245
Automatic Temperature Control of a Superconducting Bolometer—I. A. Khrebtov, N. M. Gopshtein, and G. A. Zaitsev	292	247
Cryostat for Investigating Chemical Reactions by the Method of Matrix Isolation —A. K. Mal'tsev, R. G. Mikaélyan, and O. M. Nefedov	295	249

Instrument for Monitoring the Operation of a Metallic Helium Cryostat—V. V. Permyakov and N. N. Kovriga 298 251
Rapidly Detachable Joint for Main Liquid Nitrogen Lines—B. M. Kaporovskii, E. T. Glebova, Yu. A. Okunev, A. A. Rusov, and I. A. Salamatov 300 253
Digital Angle Converters—M. A. Kuz'michev, V. V. Kashirin, and E. S. Kirikov 301 254
Alignment Mechanism with an Electromagnetic Drive—V. I. Marin, L. I. Lagerev, and I. V. Averkieva 305 257
Appliance for the Chemical Cutting of Samples—V. N. Kopylov and L. P. Mezhov-Deglin ... 308 260

ABSTRACTS
Radiation Stability of the Counting Characteristics of NaI(Tl) Scintillation Crystals—N. Yu. Gurevich, R. A. Nikulina, N. S. Pronkin, L. N. Utkina, V. V. Khakhalin, and Yu. A. Tsirlin 309 261
Unit for Multichannel Recording of the Spectrum of Laser Radiation Scattered by Plasma Electrons—A. A. Besshaposhnikov, I. Kh. Kuchuberuya, N. V. Simonova, A. Z. Rakhel'kin, A. A. Arsen'ev, and G. A. Zeitunyan 311 262
Transistorized Level-Meter for Cryogenic Liquids—V. I. Kabanov 312 262

REVIEWS OF INSTRUMENTS
Modernization of the AI-256 for Sequential Amplitude-Time Measurements—G. N. Belozerskii, V. G. Semenov, and V. Ya. Tirskii 313 264
Improving the Network of the E11-2 Magnetic Field Intensity Meter—G. S. Anufriev and D. P. Bernatskii 315 265
Modification of the DA-601L Nuclear Magnetic Resonance Spectrometer for Observation of the Internuclear Double Resonance Spectra of H—{H}, H—{^{31}P}, H—{^{13}C} 317 266
Simple Attachment to the IKS-14 Spectrophotometer for Measurement of the Reflection Coefficient—L. N. Strel'tsov and I. V. Khaibullin 320 268
Fabrication of a Support Plate with a Changeable Insert for the Recording Device of the UR-10 Spectrophotometer—V. I. Lantsov and V. P. Losev 322 269
Photoholder for 16 Photographs for the UÉMV-100V Electron Microscope—L. I. Bezruk, N. N. Zaitsev, and G. I. Freze 323 270

NEW INSTRUMENTS 325 271
APPENDIX i

Volume 14, Number 2, Part 1 March-April, 1971

Photomultipliers in Radiation Fields (Review)—A. M. Dyutsko and A. N. Pertsev 335 7

NUCLEAR EXPERIMENTAL TECHNIQUES
Study of the Acceleration Modes in Linear Ion Accelerators by Means of a Spectrometer Having a Fixed Setting—V. A. Batalin, A. A. Kolomiets, and R. P. Kuibida 345 16
Microtron for the Radiation Physics of Semiconductors—V. G. Seryapin, V. A. Patrenin, and Yu. M. Limasov 350 21
Automatic Frequency Control in a Microtron—S. F. Zhulinskii, É. A. Luk'yanenko, and A. R. Mirzoyan 353 24
Equipment for Measuring Small Magnetic Fields in the Ring Electromagnet of a Proton Synchrotron—M. P. Vasil'ev, A. S. Gorelkin, V. G. Dubasov, and I. V. Mozin ... 355 26
Experiments on the Recuperation of the Energy of an Electron Beam—E. A. Abramyan and A. N. Sharapa 361 30
Use of Pressed Porous Nickel-Oxide Cathodes to Obtain Intense Electron Beams—K. P. Rybas, V. K. Pavlov, and B. N. Telepaev 364 33
Measuring the Coordinates of the Center of Gravity of a Beam of Charged Particles by Means of a Proportional Chamber—V. A. Biryukov, V. G. Zinov, and A. D. Konin ... 367 36

	Engl.	Russ.
Device for Remote Control of the Turning and Changing of Targets in a Nuclear-Reactor Chamber—N. F. Khalin, V. Ya. Golovnya, and V. A. Shilyaev	370	38
Multidimensional Analysis of the Differential Cross Section of the (n, n'γ)-Reaction Involving Pure Isotopes—E. A. Andreev, S. P. Sit'ko, and V. A. Shevchenko	373	40
Universal Gamma-Resonance Spectrometer—A. V. Dolenko, B. G. Egiazarov, and A. I. Shamov	377	43
Proton Spectrometer with Automatic Follow-Up of the Distribution Maximum—L. S. Zhurina, L. G. Ol'dekop, V. V. Polenov, and B. I. Khazanov	380	46
Time-of-Flight Analyzer for Measurements of the Energy and Mass Spectra of Particles—A. A. Sysoev, B. I. Nikolaev, and G. A. Samsonov	383	48
Time Locking of a Total-Absorption Spectrometer Based on an FÉU-49 Photomultiplier—Yu. A. Aleksandrov, V. A. Kozlov, A. V. Kutsenko, V. N. Maikov, and V. V. Pavlovakaya	387	52
Fast-Neutron Time-of-Flight Spectrometer—M. E. Gurtovoi, A. S. Kukhlenko, B. E. Leshchenko, G. Pete, and V. I. Strizhak	390	54
Certain Possibilities of the Application of the Two-Dimensional Analysis Mode in Neutron Spectrometry—A. A. Omel'yanenko, I. M. Stoletova, and E. N. Matveeva	392	56
Universal Neutron Diffractometer Having a Variable Wavelength—V. A. Somenkov, K. P. Amirkhanov, M. G. Zemlyanov, V. I. Marukhin, and S. Sh. Shil'shtein	397	60
Determining the False Curvature of Tracks in a Wilson Chamber—Yu. V. Anishchenko	400	62
Low-Voltage Spark Chamber—K. M. Avakyan, R. V. Aivazyan, V. M. Krishchyan, and É. M. Matevosyan	404	66
Memory Time of Wire Spark Chambers—V. P. Kanavets, V. I. Martynov, and V. V. Ryl'sov	406	68
Memory Time and Dead Time of a Streamer Chamber—N. Z. Anisimova, V. A. Davidenko, B. A. Dolyoghein, S. V. Somov, and V. N. Staroseltsev	408	70
Use of Pulsed X Radiation to Measure the Characteristics of Narrow-Gap Spark Chambers—V. P. Kanavets, V. I. Martynov, and V. V. Ryl'tsov	411	72
Characteristics of Magnetostriction Spark Chambers for Experiments under Conditions of Large Background Levels—T. S. Grigalashvili, Yu. V. Zanevskii, V. D. Peshekhonov, and E. A. Silaev	414	75
Number of Sensitivity Centers in the Microcrystals of a Nuclear Photographic Emulsion—T. V. Grishkina and V. I. Kalashnikova	419	79
Unit for High-Speed Inspection of Plates with a Nuclear Emulsion—A. P. Zav'yalov, V. N. Markov, and L. M. Rogunov	422	82
X-Ray Analyzer with a Ge(Li)-Detector—S. A. Baldin and L. M. Ioannesyants	424	84
Differential Cerenkov Counter with a Rate Resolving Power up to $2 \cdot 10^{-6}$—Yu. P. Gorin, S. P. Denisov, S. V. Donskov, R. N. Krasnokutskii, A. I. Petrukhin, Yu. D. Prokoshkin, D. A. Stoyanova, and R. S. Shuvalov	427	87
Scintillation Hodoscope with Light Coding—A. P. Bugorskii, A. A. Borisov, A. A. Derevshchikov, Yu. A. Matulenko, A. P. Meshchanin, S. B. Nurushev, V. L. Solov'yanov, L. F. Solov'ev, E. V. Smirnov, V. V. Siksin, and I. M. Shalashov.	430	89
Calculation of the Efficiency of Recording Gamma-Radiation from Point Isotropic Sources by Means of NaI(Tl) Crystals—I. E. Konstantinov, I. F. Moiseev, P. D. Slavyagin, and G. A. Fedorov	433	91
Effect of Admixtures on the Temperature Instability of Liquid Scintillators—L. Ya. Zhil'tsova, I. I. Zemskova, E. N. Matveeva, and V. G. Tyminskii	439	97
System for Transmitted Experimental Data—O. A. Dubrovskii, L. A. Matalin, V. I. Smirnov, V. L. Chernukhin, Yu. I. Yazykov, and G. Ya. Venetskii	441	98
ELECTRONICS AND RADIO ENGINEERING		
Fast Amplitude-Digital Converter Having a High Resolving Power—G. Reznikov and K. Tarnai	446	106
Time-Pulse Converter Based on an Analog-Dynamic Memory Device—K. N. Bakinovskii, V. D. Grek, I. A. Malevich, A. F. Chernyavskii, and A. K. Yakushev	450	107

Time-Coordinate Compensator for Time Spectrometers with Long Scintillators —L. Ondrish, S. V. Mukhin, S. V. Rikhvitskii, I. N. Semenyushkin, M. Turala, P. Khorvat, and A. N. Khrenov 454 110
Semiautomatic Device for Measuring the Energy Resolution of Spectrometers —V. P. Selyutin, O. P. Fedovseeva, and K. G. Finogenov 457 112
Amplifier for Precise Spectrometry under Large Loads—R. G. Ofengenden and A. A. Ostapenko 459 114
Digital Instrument for Selection and Counting of Irregular Pulses—P. M. Ananichev, A. M. Burd, and B. N. Motenko 462 117
Analog-Digital System for Tuning and Stabilizing the Frequency of a Recirculation Generator—F. M. Dmitriev, I. A. Malevich, and A. F. Chernyavskii 466 120
Stable Semiconductor Oscillator Producing Two Coherent Radio Frequencies —V. A. Grishkin, L. M. Pol', and V. I. Teleshevskii 468 122
Oscillators Which Produce a Pulse Train Having a High Repetition Frequency —V. P. D'yakonov 471 124
An rf Pulse Generator with Phase Locking of the High-Frequency Carrier —V. N. Gubarchuk 474 127
Pulse Generator for Monitoring the Linearity of Spectrometric Equipment—A. A. Ostapenko .. 476 129
Generator Producing Short High-Voltage Pulses—V. A. Naidenov 479 132
Pulsed High-Power Excitron Current Modulators—L. G. Koshcheev 483 134
Pulse Shaper Based on Transistors and Dynistors—V. M. Borovikov, M. M. Karliner, and A. S. Medvedko 485 136
Multiple Breakdown in a Peaking Break of a Low-Ohm Line—L. P. Afonin, M. V. Babykin, and A. V. Bartov 487 138
Multifunctional Pulse Circuit Based on Avalanche Transistors—V. P. D'yakonov 490 140

Volume 14, Number 2, Part 2 March-April, 1971

Device for Controlling Two-Triode Switches—B. A. Aytekman and M. Kh. Blikh 493 143
High-Speed Network for Controlling an Electrooptical Polarization Switch —V. A. Vul' 496 145
Nanosecond Modulation for a Kerr Shutter—V. E. Gordeev and Yu. S. Matveev 501 149
Multibeam Schilieren Oscilloscope for Pulsed Plasma—A. A. Beshaposhnikov, G. G. Zukakishvili, I. Kh. Kuchuberiya, and N. V. Semonova 503 151
Measurement of Galvanomagnetic Effects in Semiconductors in Pulsed Magnetic Fields —B. P. Zot'ev, K. N. Kot, and V. I. Yudaev 506 154
Device Which Simulates an Additive Mixture of Signals, Interference, and Noise —V. N. Gubarchuk 510 157
Magnetic Parametric Amplifier for Infralow Frequencies Which Is Based on a Thin Magnetic Film—N. N. Kurdyumov and V. V. Potemkin 513 159
Digital Integration of Nuclear Magnetic Resonance (NMR) Spectra in Real Time —Yu. D. Nechaev, Yu. L. Kleiman, and N. V. Morkovin 516 161
Storage of Nuclear Magnetic Resonance (NMR) Spectra Using Calibrated Shifts of the Magnetic Field—Yu. D. Nechaev, Yu. L. Kleiman, and N. V. Morkovin 519 164
Instrument for Investigating the Dielectric Properties of Liquids at Microwave Frequencies over a Wide Temperature Range—V. V. Levin, T. M. Usacheva, and V. G. Petrosyan 523 167
Measurement of the Magnetic Permeability and the Tangent of the Magnetic Loss Angle of Magnetodielectrics at Microwave Frequencies—S. A. Shmulevich 526 170
Method of Measuring the Conductivity of Small Crystals at a Frequency of 10^{10} Hz —L. I. Buranov and I. F. Shchegolev 528 171
Unit for Measuring the Phase Distribution of the Field in Open Quasioptical Systems —L. N. Vershinina 531 174

High-Speed Power Stabilizer – L. B. Mashkinov, I. M. Goryainov, Yu. M. Grigor'ev, and L. N. Gal'perin 534 176
Stabilized Power Supply Having a Low Pulsation Level – V. A. Plotnikov and G. S. Serebryakov . 538 180

GENERAL EXPERIMENTAL TECHNIQUES

Mass Spectrometer for Precision Isotopic Analysis of Hydrogen – I. V. Abashidze, V. G. Artemchuk, V. E. Vetshtein, and I. E. Gol'denfel'd 540 182
Operational Characteristics of the N-5S Pump with a Sorption Trap Using Ferric Oxides – V. P. Konyaev, E. A. Maslennikov, and Yu. M. Pustovoit 543 185
Ultrahigh-Vacuum Valve with an Indium Seal – V. D. Dvoichenko and E. I. Vzatskaya 549 190
Certain Peculiarities of Powerful Cathode-Ray Guns Having a Plasma Cathode – M. A. Zavyalov, V. I. Perevodchikov, G. G. Timofeeva, and K. A. Yumatov 551 192
Unit for Depositing Metal Films and Annealing Them at 80 to 800°K – V. L. Arbuzov, A. V. Baldin, A. E. Buzynov, A. K. Kikoin, A. F. Matvienko, and A. A. Slobodchikov. . . . 555 196
Units for High-Temperature Investigations of the Kinetics of the Interaction of Structural Materials with Gases at Low Pressures – F. Ya. Lein, A. G. Nesterenko, E. E. Pavlov, and E. N. Partinson 559 199
Use of Vacuum Spark Relays in Pulse Generators for Igniting Lasers – I. M. Divil'kovskii, D. V. Kovalevskii, and A. L. Shakhnovskii 562 202
Holographic Stroboscope Based on a Ruby Laser Having a Passive Shutter – M. M. Butusov, V. Ya. Demchenko, and Yu. G. Turkevich 564 203
Use of an Argon Laser for Investigating Raman Light Scattering – V. S. Gorelik, M. M. Sushchinskii, and A. E. Novik 566 205
Observation of Birefringence Which Develops in the Active Elements of Lasers due to the Effect of Pumping – A. G. Malysh, Yu. A. Nestrizhenko, and V. V. Shevchenko 569 207
Monitoring the Optical Properties of Nonlinear Crystals – A. I. Kovrigin, V. G. Tunkin, and A. I. Kholodnykh 572 210
Stroboscopic Unit for Luminescence Research – A. G. Skleznev 575 212
Time Parameters of Light-Emitting Gallium Phosphide Diodes and the Transient Response of an FÉU-30 Photomultiplier – I. M. Gurevich, L. E. Finkel'shtein, N. N. Fokina, V. V. Korobkin, and A. A. Malyutin 579 216
Coordinate-Sensitive Pyroelectric Radiation Receivers – L. S. Kremenchugskii and S. K. Sklyarenko 582 219
Hydropneumatic Drive for the Scanning System of a Fabry-Perot Spectrometer – V. A. Rozuvanova 584 220
Water-Cooled Solenoids for Obtaining Constant Magnetic Fields Having an Intensity of 100 to 200 kOe – V. G. Vesalago, V. M. Ivanov, P. P. Klyavin, L. P. Maksimov, V. V. Rozhdestvenskii, and V. P. Shurukhin 587 223
Precision Stabilizer for the Magnetic Field of an Electromagnet – A. N. Gil'manov, I. G. Bikchantaev, and E. E. Savin 590 225
Stabilization of a Weak Magnetic Field on the Basis of Ferromagnetic Resonance in a Thin Film – B. F. Alekseev, A. A. Ditev, S. P. Repnikov, B. E. Sobotkovskii, V. B. Ustinov, and G. I. Shal'nikov 592 227
X-Ray Chamber for Investigating Highly Dispersive Powders in the Temperature Range from –175 to +400°C – V. A. Kotel'nikov and Yu. I. Petrov 596 230
Monitoring the Parallelness of an Electron Beam by Means of Moiré Patterns – V. N. Gusev and V. A. Krasyuk 598 232
Evacuation of Commercial Electron Microscopes by Adsorption Pumps – A. L. Donde, A. K. Malik, I. M. Fishman, and A. L. Seryugin 601 234
Procedure for Determining the Shape of Autoionic Points – L. P. Potapov and P. P. Shiryaev 604 236
The Probe Method of Determining the Thermal emf of Epitaxial Films – L. I. Anatychuk, V. T. Dimitrashchik, O. Ya. Luste, and A. P. Mel'nik 607 239

	Engl.	Russ.
Measurement of the Junction Resistance of Contacts on Thin Semiconductor Layers – V. Ya. Niskov, V. D. Zaddé A. K. Zaitseva, and V. I. Strel'tsova	609	240
Dependence of the Resistance of Nonrectifying Contacts with GaAs on the Frequency and Density of the Current – V. P. Duraev, M. K. Pugach, and V. I. Shveikin	612	243
Pressure Stabilization in a Hydraulic Press – V. V. Evdokimova, A. D. Novikov, and V. K. Naumov	614	244
Differential Mercury Manometer with an Acoustic Reading Device – B. Ya. Gornshtein and O. B. Stupak	616	245
Fabrication of Thin Flat Cobalt Mirrors for the Polarization of Thermal Neutrons – N. S. Shadovskaya and V. A. Beketov	618	247
Obtaining Thin Self-Maintaining Carbon Films Having a Large Area – V. M. Korol' and L. K. Mamaev	620	249
Calibration Characteristic of a Tungsten–Molybdenum Thermocouple – G. E. Pletenetskii	622	251
Gallium Antimonide Resistance Thermometers – D. Kh. Amirkhanova	624	252
Gas-Cooled Current Input Leads Having a Variable Cross Section – V. S. Okolotin and V. I. Bol'shakov	626	253
Optical Cryostat with Controllable Cooling in the 5 to 260°K Range – Yu. V. Osipov	*630*	*256*
Liquid-Nitrogen Level Controller–S. M. Benyaminovich and L. M. Fisher	633	258
ABSTRACTS		
False Pulses in Neutron Detectors–V. K. Bogatyrev, Yu. V. Volkov, V. V. Charychanskii, and V. G. Zolotukhin	635	260
A System for Controlling the Photography of Spark Chambers and an Oscilloscope Screen –V. A. Krendelev and G. V. Rybakov	637	261
A Communication Device of a Scanning Automaton for Operation with a CDC-1607A Computer–V. D. Inkin, Yu. A. Karzhavin, and Yu. I. Susov	639	261
Shaping Devices for Reference and Track Signals–A. A. Ivanov, V. E. Ivchenko, and G. N. Khromova	641	262
Block for Controlling the Buffer Memory of a Scanning Automaton–Yu. G. Voitenko, V. D. Inkin, Yu. A. Karzhavin, and V. M. Kotov	642	263
Single-Crystal Ultrasonic Delay Lines in Compact Memory Blocks–N. I. Basovskii, V. S. Bondarenko, and V. N. Il'inskii	644	264
Effect of Ion Desorption Currents from the Anode on the Readings of Ionization Manometers *at Ultralow Pressures*–T. V. Koroleva, and E. A. Penchko	*646*	*265*
REVIEWS OF INSTRUMENTS		
Use of Memory Cathode-Ray Tubes in Standard Oscilloscopes–N. S. Babenko, N. N. Vashchenyuk, A. A. Egorov, and A. N. Sudarkin	648	266
Ion Source of the MI-1305 Mass Spectrometer for Research at High Temperatures –K. Skudlarski	651	268
Improving the Signal-to-Noise Ratio in the E11-2 (IMI-2) Magnetic Field Intensity Meter –M. M. Zaitov and E. A. Kostromin	654	270
NEW INSTRUMENTS	656	272

Volume 14, Number 3, Part 1 May-June, 1971

Equipment for X-Ray Structural Investigations (Review) – M. M. Umanskii and D. M. Kheiker	665	7
NUCLEAR EXPERIMENTAL TECHNIQUES		
Acceleration and Extraction of a Deuteron Beam from the Synchrophasotron of the Joint Institute for Nuclear Research – A. M. Baldin, Yu. D. Beznogikh, L. P. Zinov'ev, L. B. Issinskii, G. S. Kazanskii, A. L. Mikhailov, V. I. Moroz, N. L. Pavlov, and G. P. Puchkov	685	29
Spectrometer for a Pulsed Electron Beam – A. L. Gerasimov, E. G. Dubinov, and B. G. Kudasov	688	31

Improvement of the Parameters of the External Beam of a Cyclotron by Means of a Slit Collimator – N. N. Krasnov, A. A. Ognev, and A. A. Ponomarev	692	35
Injector of a Linear Accelerator for Multiply Charged Ions (LUMZI-10) – E. L. Revutskii, G. M. Skoromnyi, P. S. Markin, S. L. Meleshkov, L. T. Venevtsev, P. K. Dron', O. A. Fedorov, and Yu. V. Kas'yanov	695	38
Modified Flat Pole for a Hard-Focusing Channel in a Linear Ion Accelerator – Yu. D. Beznogikh, M. A. Voevodin, and L. P. Zinov'ev	699	41
High-Voltage Source for 2-MeV Ion and Electron Accelerators – V. L. Al'bertinskii, L. V. Kuritsyna, O. F. Nikonov, and O. B. Ovchinnikov	702	43
Pulsed Ion Source Producing Pulses of Nanosecond Length – V. B. Anufrienko, B. V. Devkin, V. L. Moroka, and O. A. Sal'nikov	705	46
Neutron α,n-Sources Based on ^{241}Am and ^{9}Be – B. M. Aleksandrov, M. A. Bak, A. S. Krivokhatskii, Yu. G. Petrov, and É. A. Shlyamin	709	50
50-cm Liquid-Hydrogen Target with Mylar Windows – Yu. T. Borzunov, L. B. Golovanov, V. L. Mazarskii, and A. P. Tsviev	712	52
150-cm Liquid-Hydrogen Target – L. B. Golovanov	715	55
Use of Multiple-Tape Sources in High-Resolution Beta Spectrometers – R. A. Kalinauskas, K. V. Makaryunas, and R. L. Davidonis	717	57
Using the Monte Carlo Method to Calculate the Characteristics of a Scintillation Gamma Spectrometer in a Ring Geometry – L. D. Kortyn, D. B. Pozdneev, and N. N. Trunov	719	58
Determination of the Energy Spectrum of Cosmic Particles – A. M. Gal'per, A. V. Kurochkin, B. L. Luchkov, and Yu. T. Yurkin	722	60
Multichannel Energy Analysis of Ions and Fast Charge-Exchange Atoms in the Investigation of a High-Temperature Plasma – V. S. Koidan	725	63
Time-of-Flight Spectrometer for Fast Neutrons – N. S. Biryukov, B. V. Zhuravlev, N. V. Kornilov, Yu. S. Kulabukhov, V. I. Plyaskin, and O. A. Sal'nikov	729	66
Two-Crystal Neutron Spectrometer and the Possibilities of Its Application – S. Sh. Shil'shtein, V. I. Marukhin, M. Kalanov, and V. A. Somenkov	733	70
Detector for Measuring the Energy of Ultrarelativistic Particles – M. P. Lorikyan	737	73
Neutron Detector for the Investigation of Photonuclear Reactions – Yu. I. Sorokin, V. A. Krushchev, and B. A. Yur'ev	739	75
Effect of a Magnetic Field on the Localization of Tracks in a Spark Chamber – N. Kh. Bostandzhyan, G. A. Marikyan, and K. A. Matevosyan	742	78
High-Speed High-Pressure Valve for a Bubble Chamber – M. P. Balandin, V. I. Granichev, V. A. Moiseenko, M. I. Solov'ev, V. L. Trifonov, and B. Shmidtke	745	80
ELECTRONICS AND RADIO ENGINEERING		
Device for Transmitting Digital Information from an Electronic Computer to a Controlled Object – L. M. Dykhnenko, N. A. Kryukova, and L. T. Matveeva	748	84
Logical Circuits Based on a Transistor Current Switch – V. A. Avdeev and V. M. Kuznetsov	751	86
Device for Storage and Display of Text – V. S. Govorov	754	89
Coincidence-Anticoincidence Circuit Having a Nanosecond Resolving Time – A. A. Rudenko	758	92
Scaling Decade for Frequencies up to 200 MHz – L. Dubik and Z. Tsisek	761	95
Linear Amplitude-Number Converter – S. I. Varvarin, B. P. Korolev, Yu. G. Kulesh, and A. I. Ghernitsyn	764	98
Threshold Device for Pulse Shaping – A. Ia. Sinitsyn	766	100
Flipflop Having a Short Recovery Time – V. G. Brovchenko and Yu. D. Molchanov	768	102
Generator Which Produces Control Pulses and Pulse Gates – S. G. Basiladze	770	104
Transistorized Nanosecond Pulse Generator – A. M. Fishtein	773	106
Rectangular rf-Pulse Generator – G. P. Petin	775	107
Relaxation Oscillator Based on an Avalanche Transistor with Forced Self-Synchronization – V. P. D'yakonov and D. G. Ali-Zade	777	108
Amplifier and Discriminator for Operation with Proportional Slow-Neutron Counters – B. A. Kotov and V. I. Pogrebnoi	779	110

Use of Field-Effect Transistors in Spectrometric Amplifiers—V. S. Ponomarev and A. N. Zhukovskii 781 111
Instrument for Determining the Duty Cycle of Pulse Sequences—V. V. Zaitsev 784 114
Investigation of Electrical Processes in Systems Containing Linear and Nonlinear Inductances in the Presence of Short High-Voltage Pulses—O. G. Il'in and A. M. Shendrovich 786 115
Unit for Investigation of the Joint Probability Distribution of the Amplitude and Phase of Radio Signals—L. K. Andrusevich, V. N. Karpov, and D. I. Sheinman 789 118
Determination of the Distribution Laws of Random Processes Recorded on Photographic Film —A. P. Beloshitskii 792 120
Infralow-Frequency Spectrum Analyzer—V. V. Losev 794 121
Infralow-Frequency Noise Generator—G. A. Gladkikh, V. G. Panov, I. P. Pakhomov, and P. D. Chichik 797 124
Attachment for Measuring Infralow-Frequency Voltages—V. V. Losev 799 126

Volume 14, Number 3, Part 2 May-June, 1971

Sensitive Synchronous Detector—K. P. Abdurakhmanov and B. A. Kotov 801 127
Synthesis of Frequencies for a Nuclear Magnetic Double Resonance Spectrometer from One Reference Source—V. A. Zabrodin, V. E. Solov'ev, and L. N. Gal'perin 803 128
Autodyne Detector Having a Constant Sensitivity—V. A. Yudin and L. M. Fisher 806 131
Comparator for Investigating Radicals of the Working Substance of Electron Paramagnetic Resonance Magnetometers—M. M. Tel'minov and A. S. Sobolev 809 134
Amplifier Having a Bandwidth of 0.8 GHz—V. I. Pil'skii 812 136
Traveling-Wave Maser with a Broadened Passband for the 5-cm Range of Wavelengths —G. S. Misezhnikov, M. M. Mukhina, and B. B. Shteinshleiger 814 138
Differential Method of Measuring the Dielectric Constant of Solutions Having Large Losses in the Millimeter Range of Wavelengths—B. A. Kashpur and V. Ya. Maleev 816 140
Investigation of the Energy Distribution of Photoemission by the Method of Modulating the Delaying Potential—Yu. P. Udoev 819 142
Video-Monitoring Device for an Electronic Microprobe Instrument—E. B. Korob and S. A. Ditsman 821 144
Measurement of the Loss Resistance of Semiconductor Diodes—V. S. Blagoveshchenkii, G. Kh. Zyryanov, and V. L. Yanyushkin 823 145
Use of Phosphors to Investigate the Thermal Modes of Radio-Electronic Circuits —L. V. Kutukov, L. V. Mitrofanova, Yu. P. Timofeev, S. A. Fridman, and V. V. Shchaenko 826 147
Magnetomodulation Pickup for Stabilization of Direct Current—G. I. Kugushev 828 149

GENERAL EXPERIMENTAL TECHNIQUES
Vacuum-Seal Tests Using a Halide Leakage Detector—A. I. Evlampiev and V. I. Karpov 830 152
Sorption Trap for Mechanical Vacuum Pumps—N. A. Kapralova and A. S. Nazarov 832 154
Connection Joint in a Heated Vapor Duct of an Ion Source—V. N. Ignat'ev and V. P. Naumkin . 835 156
High-Current Pulsed Electron Gun Based on an ÉLIT-1 Accelerator—V. A. Danilychev and V. E. Khodkevich 837 157
Vaporization of the Oxides of Rare-Earth Metals by Means of an Electron Beam —D. I. Chernobrovkin, V. V. Bakhtinov, and Yu. G. Sakharov 839 159
Arc Cathode for a Continuous Discharge under a Reduced Working-Gas Pressure —V. I. Donin 841 161
Method of Suppressing a Multipactor Discharge—V. G. Andreev and D. G. Zaidin 845 164
The Triotron—a Controllable Device with Crossed Fields—A. I. Vishnevskii, L. P. Pavlenko, A. I. Soldatenko, and A. I. Shendakov 847 165
Diagnostic Aggregate Containing a Laser Interferometer for Measurement of the Electron Concentration in the Jet of a Stationary Plasma Source—A. A. Malyutin, V. V. Rybakov, S. G. Starostin, A. K. Subbotin, and S. N. Ushanov 849 167

	Engl.	Russ.
High-Frequency Electrical Probe in a Plasma—A. M. Kudryavtsev and I. S. Fishman	851	169
Image Converter with Controlled Image Brightness Using Penetration Secondary Emission —M. M. Butslov and V. S. Malysheva	854	171
Pulsed Light Source for Instruments Operating in Magnetic Fields—A. Z. Barabashev, E. N. Glukhov, A. G. Kostin, E. V. Kuznetsov, O. I. Mikhailov, S. N. Parshikura, V. I. Snyatkov, and M. A. Samarin	858	174
Piezoceramic Pickup for Measurement of Pressure in Flashlamps—V. V. Ivanov, V. G. Nikoforov, A. G. Rozanov, V. V. Kharitonov, and I. I. Yazev	860	176
Generator Producing Light Pulses of Nanosecond Length—A. M. Fishtein	863	178
Crystal Lasers with Pyrolamp Illuminators—A. I. Bodretsova, A. A. Kaminskii, N. N. Kirilova, and S. I. Levikov	866	180
Helium—Neon Laser with a Mercury Cathode—I. N. Goncharuk, V. Yu. Davydov, I. T. Sevatinova, and É. V. Chisler	868	182
Internal Frequency Selection of a CO_2 Laser Using a Fabry-Perot Interferometer —Yu. N. Gromov, V. P. Tychinskii, N. Sh. Khaikin, and V. P. Khar'kov	870	183
Dynamic Cavity Resonator for Pulsed Lasers—F. V. Karpushko	874	186
Laser Based on a He + ^{114}Cd Mixture for Exciting Scattered-Light Spectra—V. P. Zaitsev and L. M. Sabirov	878	189
Spectral Reflectance of a Number of Substances and Diffusely-Reflecting Coatings in the 210 to 2600 nm Range—L. M. Vinogradova, L. M. Khlopina, and V. S. Chukin	880	191
Determination of the Lines of Force in Axisymmetric Magnetic Fields—G. P. Prudkovskii and A. V. Khotina	883	194
Calculation of a Four-Section System for Compensation of a Uniform Magnetic Field —E. F. Tret'yakov	885	195
Compact Polarizer for Magnetization of the Fluid in Nuclear Magnetic Resonance Instruments —L. A. Basin and V. V. Ekaterinin	888	198
Determination of the Integral Characteristics of Anomalous Transmission of X Rays by the Method of Varying the Effective Thickness of the Crystal—A. S. Fokin and V. M. Al'tschuller	890	200
Scintillation Blocks for the Detection of Longwave X Radiation—V. R. Al'perovich, N. B. Grinberg, A. V. Kozlov, and N. I. Komyak	893	202
Glass Camera for Observing the Diffraction of Low-Energy Electrons—S. Mroz	896	205
Procedure for Fabricating Surface-Barrier Structures Chemical Deposition of Metals on the Surface of a Semiconductor—Yu. A. Gol'dberg, D. N. Nasledov, and B. V. Tsarenkov	899	207
Batcher for Fabricating Epitaxial Layers—F. A. Kuznetsov, V. S. Kravchenko, I. G. Larionov, and M. Ya. Marchenko	902	210
Ultra-High-Vacuum Cryostat with an Independent Pump—B. Z. Kanter	904	211
Automatic Controller for Controlling the Level of Liquid Helium in a Cryostat —V. A. Lopyrev and N. K. Mukhin	907	214
Device for Producing Pure ^{4}He—L. P. Mezhov-Deglin	911	217
Mechanism for Carrying out Angular Microdisplacements with a Lamellar Elastic Element —L. I. Lagerev, V. I. Mar'in, and V. A. Moiseev	913	218
Improving the Characteristics of Semiconductor Self-Regulating Thermostats—A. R. Shelvag, V. I. Strechen', P. A. Kotsyamakha, and O. A. Lyutyk	915	220
Eliminating the Effect of Line-Voltage Instability on the Operation of a Thermal Controller —Ya. V. Vasil'ev, A. F. Neermolov, V. A. Gerasimov, and G. V. Kononova	917	221
ABSTRACTS		
Generator for Producing Powerful Pulses of Electron Beams and X Radiation (The RIUS-5) —E. A. Abramyan, S. B. Vasserman, V. M. Dolgushin, L. A. Morkin, O. P. Pecherskii, and V. A. Tsukerman	919	223
System for Automatic Recording of the Data of Mass-Spectrometric Measurements on Punched Tape—S. P. Samsonov and I. M. Gorokhov	921	224
Anomalous Behavior of Ultra-High-Vacuum Electron Ionization Manometers after Heating of the Anode Grid—T. V. Koroleva and E. A. Penchko	923	225

Calculation of Vacuum Systems Having a Distributed Gas Load—G. L. Saksaganskii 925 226
Increasing the Control Sensitivity and Accuracy of Pressure Regulators—I. S. Sidorenko, G. P. Shemonaev, and V. I. Makhan'kov 927 227

REVIEWS OF INSTRUMENTS
Attachment to an AI-256 Analyzer for Measuring the Probability Distribution of Time Intervals—I. R. Gurlakov 929 229
Attachment for Recording Nuclear Magnetic Resonance Spectra of ^{19}F on a Proton Radiospectrometer—A. G. Kuchetyaev, I. M. Ovchinnikov, and N. L. Oliferchuk 931 230
Attachment to the AI-128 Analyzer for Measuring the Probability Density of Random Processes—V. S. Gorbenko, A. A. Zakalyuk, E. M. Pustovoitov, and S. V. Pasechnyi 934 232
Attachment to the UR-20 Infrared Spectrometer for Discrete Recording of Spectra—V. A. Zirnitis, D. É. Otmane, Ya. Ya. Straumen, and É. É. Tardenak 936 233
Improvement of the Recording Section of the MF-4 Microphotometer—N. V. Alekseev, P. P. Barzdain, É. I. Revekina, N. P. Rodionov, and A. I. Frimer 940 237
Error of Measurements Made by Means of a Digital Frequency Meter with a Phasemeter Attachment—V. V. Borisochkin and V. I. Nestulei 942 239
Streak Camera in the Millisecond Range—A. I. Zakharov, V. V. Koretskii, and V. G. Nikolaevskii 944 240

NEW INSTRUMENTS 945 241

Volume 14, Number 4, Part 1 July-August, 1971

Networks for Particle Identification According to the Shape of the Scintillation Signals (Review)—V. G. Brovchenko 953 7

NUCLEAR EXPERIMENTAL TECHNIQUES
Efficiency of Operation of a System for Suppressing Coherent Phase Oscillations—B. I. Bondarev, B. P. Murin, and L. E. Solov'ev 975 29
Focusing Action of Microwave Fields on a Particle Beam in Cyclic Accelerators during Capture into the Acceleration Mode—A. N. Didenko and Yu. A. Nepokrytykh 978 31
Investigation of Particle Trajectories for Acceleration in a Three-Sector Cyclotron Model with Separate Magnets—V. T. Blokhin, L. N. Katsaurov, A. T. Matachun, E. M. Moroz, and L. P. Nechaeva 982 34
Two-Gap Ion Bunching at the Input of a Linear Accelerator—Yu. D. Beznogikh 986 38
Energy Scatter of Ions Which Exit from High-Frequency Sources Having a Shielded Discharge—V. M. Lavrov and S. G. Shchemelinin 989 41
Pickups for Sensing the Position of a Beam of Accelerated Electrons—V. M. Denyak, V. I. Startsev, A. A. Nemashkalo, and V. N. Ananichuk 992 43
Measurement and Monitoring of the Spatial Characteristics of the External Beams of the Erevan Ring Electron Accelerator—G. A. Arakelyan, G. S. Vartanyan, S. K. Esin, I. P. Karabekov, A. M. Kotsinyan, M. A. Martirosyan, and Yu. R. Nazaryan 996 46
Display of the Energy Spectrum of a Beam of Charged Particles at the Output of a Linear Ion Accelerator by Means of a Transparent Induction Pickup—Yu. D. Beznogikh and M. A. Voevodin 999 49
Detector Which Is Sensitive to the Spot at Which Neutrons Have Been Transmitted—B. N. Goshchitskii, S. K. Sidorov, V. V. Chernobrovkin, V. G. Chudinov, A. I. Beskorskii, B. F. Barzdo, and Yu. N. Vorgachev 1002 51
Neutral-Atom-Stream Analyzer—S. G. Konstantinov, A. F. Sorokin, and F. A. Tsel'nik 1006 54
Liquid-Hydrogen Mylar Target Having Thin Mylar Sidewalls—L. M. Vasil'ev, I. A. Radkevich, T. G. Smolyankina, and V. V. Sokolovskii 1008 56
Remote Control of Targets—L. S. Khurshudyan and A. O. Agan'yants 1010 57

	Engl.	Russ.
Calibration of a Scintillation Gamma Spectrometer—V. I. Polyakov and Yu. V. Chechetkin . . .	1013	60
Choice of the Parameters of Beam Insertion into Bubble Chambers—L. N. Gerdyukov, I. A. Danil'chenko, E. P. Kuznetsov, and A. V. Samoilov	1015	63
Determination of the Nature of Charged Particles from the Delta-Electrons in a Hydrogen Bubble Chamber—É. G. Boos, A. M. Mosienko, L. A. San'ko, Zh. S. Takibaev, and T. T. Temiraliev	1019	66
Identification of Secondary Particles from the Ionization Losses in a Hydrogen Bubble Chamber—L. A. San'ko, Zh. S. Takibaev, É. G. Boos, O. I. Volkova, A. M. Mosienko, A. G. Zaitsev, T. T. Temiraliev, and A. V. Kholmetskaya	1022	67
Measurement of the Ionization Losses of Particles in a Bubble Chamber Using a Television Measurement Semiautomaton—Zh. S. Takibaev, É. G. Boos, L. A. San'ko, Yu. V. Ovsov, O. I. Volkova, and G. M. Magonov	1025	69
Target Spark Chamber Having a Large Discharge Gap—V. A. Mikhailov and N. S. Il'in	1028	72
Device for Filling Spark Chambers Automatically—K. M. Avakyan, R. B. Aivazyan, and É. M. Matenostyan	1030	73
Efficiency of Charge Collection in Semiconductor Nuclear-Radiation Detectors—A. M. Vasil'ev, O. V. Zakharchuk, and O. P. Fedoseva	1032	74
Cerenkov Counter with a Radiator Consisting of an Aqueous Solution of Amino-H-Acid—A. V. Kuptsov, L. L. Nemenov, and Yu. M. Chirkin	1035	77
Traveling-Wave Scintillation Detector—V. M. Gorbachev, V. N. Korolev, and A. D. Chumak	1039	80
Calibration of Scintillation Tritium Counters—M. I. Balonov	1042	82
Suppression of Alpha-Particle Background in a Multicrystal Scintillation Detector—L. A. Mikailian, A. I. Afonin, A. E. Balysh, V. I. Lebedev, V. F. Apalin, and A. A. Teren'tev	1044	84
Increasing the Efficiency of Coincidences and Anticoincidences in Working with a CsI(Tl) Scintillator—V. M. Bystritskii, V. P. Dzhelepov, P. F. Ermolov, K. O. Oganesyan, M. N. Omel'yanenko, S. Yu. Porokhovoi, and V. V. Fil'chenkov . . .	1047	86
Ionization Chamber for Measurement of High Tritium Concentrations—L. F. Belovodskii, V. K. Gaevoi, and V. I. Grishmanovskii	1050	88
ELECTRONICS AND RADIO ENGINEERING		
Graphical Video Instrument Based on the BÉSM-4 and CDC-1604A Computers, and Its Utilization in Processing Chamber Photographs—A. I. Efimova, G. I. Zabiyakin, A. A. Karlov, A. P. Kretov, I. N. Kukhtina, S. V. Lesharovskii, V. I. Prikhod'ko, V. R. Trubnikov, and É. V. Sharapova	1053	91
Analog-Code Converter—B. A. Kotov and R. F. Surmanov	1059	97
Measurement of the Characteristics of Coincidence and Anticoincidence Circuits by Means of a Time-Amplitude Converter—V. I. Kryshkin, V. N. Stibunov, and N. P. Fedorov	1062	99
Broadband Converter for Converting the Current of Semiconductor Nuclear-Radiation Detectors into a Sequence of Pulses—S. A. Zharkov, I. M. Vasil'ev, V. V. Perepechaev, A. V. Sidorenko, and M. M. Khokhlova	1064	101
Instrumentation Amplifier—A. I. Vorozheikin, I. R. Dobrovinskii, E. A. Lomtev, and V. M. Shlyandin	1067	104
Obtaining the Limiting Resolving Powers of Low-Noise Preamplifiers Based on Field-Effect Transistors at 25°C—N. Ya. Sedov	1069	106
P2-Z Electrometric Integrator—V. A. Kurilov and V. V. Apinyan	1073	110
500-kV Impulsing Generator—A. I. Pavlovskii, V. S. Bosamykin, A. I. Gerasimov, and A. P. Klement'ev	1075	112
Generators Which Produce High-Voltage Pulses with a Short Time Delay—Yu. D. Karpekov, G. P. Makarov, Yu. N. Simonov, and L. K. Turchanovich	1078	114
High-Voltage Generator for Producing a Sudden Voltage Drop—L. I. Rozhkov	1081	117
Nanosecond-Pulse Generator Using Thyristors—L. I. Rozhkov	1083	119

Short-Current-Pulse Generator for Supplying Semiconductor Lasers—A. I. Andrushko 1085 121
Flipflop Having a Linear Scale over a Wide Time Range—V. A. Krendelev and V. Ya. Uglekov 1088 123
Pulse Shaper for an Electromagnetic Recorder—V. M. Katsman 1090 124
Digital Instrument for Measuring the Amplitude of Pulses Having a Nanosecond Length—A. K. Kovtun, A. N. Shkuro, and P. M. Reznik 1092 125
Television Camera for Stroboscopic Investigations—G. N. Gryazin, V. S. Saltykov, and A. N. Kapnin 1094 126
Photoresistor Circuit—L. S. Vasilenko and M. N. Skvortsov 1097 129
Contactless Method for Transmitting Signals under Conditions of Strong External Interferences—V. I. Pil'skii and Yu. N. Serdyuk 1099 130
A Transistorized Spectrum Analyzer for Low-Frequency Electrical Fluctuations—A. Ya. Zonov and N. N. Solin 1101 131
Radio-Frequency Phase Meter—L. N. Novikov and L. G. Malyshev 1104 134

Volume 14, Number 4, Part 2 July-August, 1971

Pulsed Nuclear Magnetic Resonance Spectrometer with Phase Detection—Yu. I. Manzhura, M. V. Breiman, V. V. Gorbunov, G. A. Malyukov, and V. A. Smirnov 1107 136
Stabilization of the Resonance Conditions in a Pulsed Coherent Nuclear Magnetic Resonance Spectrometer—S. I. Varvarin, Yu. G. Kulesh, and A. I. Chernitsyn 1110 138
Follow-Up Magnetic-Field Calibrator for an Electron Paramagnetic Resonance Spectrometer—V. G. Zaletov and L. P. Zotov 1114 142
Quantum Paramagnetic Amplifier for the Decimeter Range—V. M. Turevskii and P. S. Shumyatskii 1117 144
Quasi-Optical Channels at Submillimeter Wavelengths—L. N. Vershinina and V. V. Shevchenko 1120 147
Investigation of Solid Materials at Submillimeter Wavelengths—V. N. Aleshechkin, G. A. Kraftmakher, V. V. Meriakri, and E. F. Ushatkin 1123 150
Measurement of the Refractive Indices of Dielectrics at Millimeter Wavelengths—G. V. Kozlov 1126 152
Measurement of the Dielectric Parameters of Liquids at Millimeter Wavelengths—A. A. Dem'yanov and M. G. Semenov 1129 154
Measurement of the Admittance of Semiconductors at Microwave Frequencies—L. N. Ionov ... 1132 157
Automatic Recording of the Relaxation Curves $\varepsilon'(\omega)$ and $\varepsilon''(\omega)$—A. N. Blagodarov and É. L. Lutsenko 1136 160
Measurement of the Dielectric Constant and Magnetic Permeability Tensor of Ferrites Having Low Losses—V. M. Sokolov and P. A. Ivashchenko 1139 163
Introduction of Corrections for the Nonlinearity of a Direct-Current Q-Meter—A. I. Kovalev and V. M. Shklyarevskii 1142 165

GENERAL EXPERIMENTAL TECHNIQUES

Quadrupole Mass Spectrometer for the Mass Range up to 300 Atomic Mass Units—G. I. Slobodenyuk, A. I. Titov, V. S. Voronin, V. I. Ivashkin, V. F. Fedotov, and V. A. Kargopol'tsev 1145 168
Use of the Admission System of the MI-1309 Instrument for Precision Isotopic Analysis—M. N. Golubchina, R. E. Prilutskii, and A. I. Toksubaev 1148 170
Evaporator of a System for the Direct Introduction of Samples for Mass-Spectrometric Analysis of Organic Substances—L. K. Veselova, L. N. Gall', M. S. Komarov, and G. V. Fridlyanskii 1152 173
Tubular Evaporator—V. Yu. Pchelkin, I. S. Soldatenko, and A. A. Khoromenko 1154 174
Dielectric Strength of Insulators in a Vacuum—A. P. Solodovnikov 1156 176
Investigation of Electron Emission Induced by Laser Radiation—A. A. Shchuka 1158 177

Investigation of the Threshold Capabilities of Photoelectron Multipliers at a Wavelength of λ = 530 nm—E. A. Demyanova, L. V. Kononchuk, and V. I. Markov	1160	179
Ruby Laser for Generating Microsecond Light Pulses Having a Narrow Spectrum—V. I. Mishin	1163	181
Source of High-Intensity Nanosecond Light Pulses—Ya. S. Elenskii	1165	183
Spark Light Source for Framewise Photographing—V. N. Borisov and G. I. Mishin	1167	184
Formation of Light Flashes Having a Stipulated Length—B. V. Kalachev, A. V. Podmazov, and A. S. Frolov	1169	186
Peculiarities of Obtaining Powerful Light Pulses Having a Complex Shape—G. L. Benediktov and N. I. Mikhailov	1171	187
Measurement of the Power of a He+Ne Laser—V. A. Plotnikov and L. N. Chastukhina	1173	189
Choice of Photoreceivers for the Reception of Weak Signals in Large Backgrounds—V. A. Bazylenko, É. S. Voronin, Z. E. Prokopenko, and G. S. Starkov	1176	190
Low-Noise Radiometer for the Infrared Range—L. V. Ksanfomaliti	1178	192
Integrating Cell Based on a Film of Selenium Having an Anomalous Photoconductivity—M. I. Korsunskii, K. S. Garger, A. P. Tyshchenko, and A. D. Volchek	1181	195
Focusing Properties of Two-, Three-, and Four-Electrode Image Converters Having Magnetic Focusing—M. M. Butslov, V. S. Malysheva, and N. Ya. Nikolaeva	1184	198
Optical Detection of Electron Paramagnetic Resonance—A. V. Komarov and S. M. Ryabchenko	1189	201
Determination of the Parameters of Nonlinear Crystals—O. F. Butyagin	1192	204
Diffraction-Doppler Light Modulator—Yu. I. Bekhtin and A. V. Shabel'nikov	1195	207
Optical Vessel for Elevated Pressures and Temperatures—M. Kh. Grishchuk	1197	209
Hall-Effect Magnetometer for Relative Measurements—M. P. Vasil'ev, A. S. Gorelkin, S. M. Luzhanskii, and I. V. Mozin	1199	210
Piezoinductive Magnetic-Induction Meter—T. V. Persiyanov, G. I. Rekalova, V. D. Kharlampliev, and A. A. Shakov	1202	213
Use of Free Precession of Nuclei for Measurement of the Discharge of a Fluid—B. I. Bashchenko and V. I. Myukhkyurya	1205	215
Preparation of Electron-Microscopic Samples of a Metal by Means of Jet Electropolishing—M. M. Kantor, A. N. Naletov, and V. F. Pichugin	1208	217
High-Temperature Heating of an Object in an Electron Microscope—Gl. S. Zhdanov	1210	219
Measurement of the Electrical Properties of Conductors at High Pressures and Temperatures—G. S. Bobrovnichii and Yu. D. Klebanov	1213	221
Method of Determining the Electrical Resistivity at High Pressures and Temperatures—D. B. Chernov and I. Ya. Shinyaev	1216	223
Measurement of the Photoluminescence, Photo-emf, and Electroluminescence of Semiconductor Materials and Structures—O. D. Knab, V. I. Magalyas, V. D. Frolov, V. I. Shveikin, and I. A. Shmerkin	1219	225
Possibility of Measuring the Electrostriction Coefficients of Dielectrics by the Method of the Induced Induction emf—É. V. Bursian, Yu. A. Afanas'ev, M. B. Grinbaum, R. Kh. Khalimullin, and V. V. Shapkin	1222	227
Dissolving Cryostat with a Condensation Pump—V. S. Edel'man	1225	229
Construction of an Electron Paramagnetic Resonance Cavity Resonator for the 8-mm Band with Provision for Changing the Investigated Samples at Liquid-Helium Temperatures—R. Yu. Abdulsabirov, V. S. Kropotov, and V. G. Stepanov	1228	232
Removable Current Lead for Power Supply in Superconducting Magnetic Systems—O. P. Anashkin, L. V. Kurnosova, L. A. Razorenov, T. M. Sidyakina, and M. I. Fradkin	1230	233
Instrument for Investigating Dry Friction at Low Temperatures—A. M. Arkharov, G. I. Voronin, and L. D. Kharitonova	1232	235
Use of Photoelectron Multipliers for the Investigation of Lightning under Field Conditions—D. A. Kuliev and F. L. Khydryov	1234	237

Engl./Russ.

Polyethylene Vessel for Observing Electron Paramagnetic Resonance in Polar Solvents —V. I. Koryakov and V. N. Pankratov 1235 238
Measurement of the Thermal Conductivity of Gases—A. S. Umanskii, A. A. Oksman, and Yu. A. Gorshkov 1237 239
Measurement of Weak Acoustic Waves by Means of a Capacitive Transducer —V. G. Braginskii, V. P. Mitrofanov, V. N. Rudenko, and A. A. Khorev 1239 241
Galvanomagnetic Dilatometer—V. V. Zhdanova, S. A. Zaitsev, V. I. Pogodin, V. S. Samuilikovich, and V. P. Sergeev 1242 243

ABSTRACTS
UNG-2 and UNG-3 Gas-Filled Neutron Tubes—A. Z. Mints 1244 245
Electron Prism Electrostatic High-Resolution Spectrometer—E. P. Denisov, M. A. Rumsh, and L. A. Smirnov 1245 245
The Parameters of Proportionally X-Ray Counters—E. F. Klyukvina 1246 246
Determination of the Parameters of Bremsstrahlung by Means of a Cathode-Ray Tube —S. A. Danichkin and V. F. Mikhailov 1247 247

REVIEWS OF INSTRUMENTS
Elimination of the Dropout of Channels in the AI-100-1 due to the Discarding of Information—V. D. Gorin 1249 249
Perfecting the Timer in the PP-15 Scaling Instrument—Ya. A. Kronis and A. D. Tumul'kan 1250 250
Static Operating Mode in the Analysis of Noble Gases Using the MI-1305 Mass Spectrometer—M. G. Pan'yan, K. A. Petrzhak, and V. F. Teplykh 1251 250
Dynamic Range of the KM-1 Quadrupole Mass Spectrometer—G. I. Slobodenyuk and V. S. Voronin 1253 252
Prolonged Operation of a One-Electron Photomultiplier—A. N. Pertsev, I. V. Reznikov, M. N. Suzin, and S. N. Cherenkevich 1255 253
Goniometric Head for an Electron Microscope—L. V. Minina and E. F. Sidokhin 1257 254
Improving the Photographic Camera of the ÉG-100A Electron-Diffraction Camera —S. V. Kaverin, L. K. Olonov, and T. N. Strizheva 1259 256

NEW INSTRUMENTS 1261 257

Volume 14, Number 5, Part 1 September-October, 1971

Methods of Reducing Internal Stray Induced Effects in Electronic Equipment and Measurement Devices (Review)—K. É. Érglis 1269 7
Inductive Bearings (Review)—A. A. Fomin 1283 22

NUCLEAR EXPERIMENTAL TECHNIQUES
Experimental Investigation of Methods for Increasing the Limiting Current in a Linear Electron Accelerator—A. I. Zykov, G. D. Kramskoi, and G. L. Fursov 1289 28
Compact Tube for Accelerating Electrons—E. A. Abramyan, G. F. Balykov, G. A. Bochkov, F. A. Sirotkin, Yu. I. Tychkov, I. L. Chertok, and A. N. Sharapa 1294 32
Stabilization of the Energy of an Accelerator Tank Circuit—É. G. Furman 1297 35
Measurement of the Frequency of Coherent Oscillations of an Electron Beam in a Synchrotron—B. A. Vizir' and M. M. Nikitin 1300 37
Transients which Accompany the Injection of Dense Electron Beams into a Compressor—Yu. G. Globenko 1302 38
Measurement of the Density Distribution of Accelerated Particles in Pulsed Beams —A. S. Knyazyatov and V. V. Mal'tsev 1307 42
Three-Meter Liquid-Hydrogen Target—L. B. Golovanov, V. L. Mazarskii, and A. P. Tsvinev 1310 45

		Engl./Russ.
Liquid-Hydrogen Conical Target—Yu. T. Borzunov, L. B. Golovanov, and V. L. Mazarskii	1314	48
Independent Calibration of a Cerenkov Spectrometer by Means of a Light Oscillator—N. N. Volodichev, Yu. N. Kuzin, O. Yu. Nechaev, I. A. Savenko, A. A. Suslov, V. M. Ustinovshchikov, and I. D. Rapoport	1317	51
Current Method of Recording Mössbauer Spectra—A. I. Beskrovny and Yu. M. Ostanevich	1320	54
Nuclear Gamma-Resonance Spectrometer Based on the AI-256 Analyzer—O. A. Bayukov, V. P. Ikonnikov, and M. I. Petrov	1323	56
1.5-m Track Spectrometer Having a High Aperture Ratio—A. V. Aref'ev, Yu. D. Bayukov, V. I. Efremenko, Yu. M. Zaitsev, M. S. Kozodaev, G. A. Leksin, G. P. Molotkov, and D. A. Suchkov	1325	57
Dependence of the Deexcitation Time of the Slow Component in Xenon on Pressure—V. I. Lyashenko, V. G. Semenov, and M. Florek	1328	60
Investigation of a Model of a 2-m Streamer Chamber in the SKM-200 Installation—V. D. Volodin, N. S. Glagoleva, Yu. A. Karzhavin, P. S. Kuznetsov, A. T. Matyushin, and V. T. Matyushin	1330	62
Determination of the Coordinates of Particles in a Proportional Chamber—V. A. Biryukov, V. G. Zinov, and A. D. Konin	1334	65
Correction of the External Orientation Elements of Photogrammetric Cameras in Stereophotography in Track Devices—É. V. Kozubskii and É. M. Livshits	1337	67
Effect of an Electric Field on the Recording of Ionizing Particles in a Photographic Emulsion—A. A. Kolyubin, V. I. Kalashnikova, B. D. Lemeshko, and Yu. F. Pevchev	1340	69
End-Window Multifilament Neutron Detector—P. N. Vorona and A. N. Maistrenko	1343	72
Thin-Layer Low-Background Scintillation Detector for Soft Protons—A. I. Afonin and L. N. Bondarenko	1346	75
Plastic Scintillators Containing Deuterium—O. A. Gunder, S. A. Malinovskaya, and L. E. Teslya	1349	78
Measurements of the Dependence of the Luminescence Yield of Scintillated Crystals on the Radiation Energy—Yu. A. Kulinich and V. G. Rukavishnikov	1351	79
ELECTRONICS AND RADIO ENGINEERING		
Two-Dimensional Analyzer for Measurement of Lifetime by the Method of Gamma—Gamma Coincidences Using the "Minsk-2" Computer—V. A. Morozov, V. I. Razov, V. I. Fominykh, and V. M. Tsupko-Sitnikov	1354	83
Anticoincidence Network for the Nanosecond Range—V. A. Avdeev and V. M. Kuznetsov	1358	87
Block for Producing "Stop" Signals—V. G. Brovchenko and Yu. D. Molchanov	1360	88
Pulse Stretcher for the Nanosecond Range—S. G. Basiladze	1364	92
Combination of the Operating Modes of Multichannel Analyzers Which Operate with Fixed Programs—S. V. Medved', A. N. Sinaev, A. A. Stakhin, and N. A. Chistov	1367	94
Device for Transformation of the Transmission Rate of Codes, Which is Based on a Controlled Register—G. N. Novopashennyi and V. K. Potapkin	1370	97
Device for Controlling a Printout Recroder—B. A. Volkov	1372	98
Reversing Trigger Counting Decade—M. G. Marinov and E. P. Ilel	1375	101
Binary Scaler with a Counting Rate of up to 200 MHz—V. M. Grebenyuk	1378	103
High-Speed Scaling Decade Based on Integrated Circuits—A. A. Perel'man	1381	106
Digital Display of Decatron States—M. I. Lerner and A. G. Ryzhevskii	1383	108
Symbol Generator—V. S. Govorov and V. F. Sitov	1385	109
Stroboscopic Integrator—V. P. Zelenin and V. A. Shishkin	1388	112
Time-Pulse Voltage Converter Based on Integrated Microcircuits—Yu. A. Masyurenko and Yu. P. Yurchenko	1390	114
Active Infralow-Frequency RC Filter—F. V. Kiyanovskii	1392	115
Selective RC Filter Based on MOS Transistors Having Direct Coupling—I. A. Belozerov	1394	117

Oscillography in Van-Der-Pohl Coordinates—S. V. Inosov 1397 119
Transistorized High-Frequency Oscillator for a Unipolar Mass-Spectrometer—L. F. Berzin..... 1399 120
Synchronous Detection of Nanosecond Pulse Signals Having a Low Repetition Frequency —I. M. Fishman and Yu. G. Shreter 1401 122
Pulse Amplitude-Number of Pulses Converter Based on an Avalanche Transistor —V. P. D'yakonov..... 1404 124
Generator Producing Powerful Nanosecond Pulses Which is Based on Nonlinear Transmission Lines Containing Ferrite—I. G. Kataev, N. F. Lipatov, A. N. Meshkov, and I. I. Rozhkov 1407 126
Synchronization of a Pulse Generator with Delayed Feedback at a Frequency of 1 GHz —I. A. Malevich and A. F. Chernyavskii 1412 130
Pulsed Blocking of a Photomultiplier in Optical Systems of the Active Type—G. A. Aver'yanov, A. S. Egorov, and B. M. Savichev 1416 133
Range of Commutatable Voltages of Vacuum Spark Gaps—V. K. Bocharov..... 1418 134
Nuclear Magnetic Resonance Signal Generator for Measurements with Circulating Water —B. V. Sokolov and V. D. Shestakov 1420 136
Equipment for Investigating Nuclear Magnetic Relaxation in Laboratory and Rotating Coordinate Systems—F. I. Bashirov, Yu. L. Popov, K. S. Saikin, and R. A. Dautov 1422 137

Volume 14, Number 5, Part 2 September-October, 1971

Suppression of Heteronuclear Spin-Spin Interaction in Nuclear Magnetic Resonance Spectra by Means of a Sweep Generator—Yu. D. Gavrilov and V. F. Bystrov 1425 140
Microwave Correlometer for Fast Processes—V. I. Pil'skii, I. S. Fishman, and O. S. Fishman 1428 142
Use of Microwave Correlometers to Observe Processes Having a Short Duration—A. G. Es'kov, V. I. Pil'skii, and I. S. Fishman 1431 144
Magnetic Field Intensity in a Strip Line—A. M. Fishtein 1433 146
Measurement of the Dielectric Constant of a Liquid Having High Losses in the 3-cm Wavelength Range—O. T. Nikolov, L. M. Snopik, and L. D. Stepin 1435 147
Investigation of Liquid Dielectrics at Submillimeter Wavelengths—V. N. Apletalin, V. V. Meriakri, and E. E. Chigryai 1437 149
Stabilizer of the Current Which Heats the Tapes of an Ion Source in a Mass-Spectrometer —S. P. Samsonov and I. M. Gorokhov 1440 151

GENERAL EXPERIMENTAL TECHNIQUES

Experience in the Operation of a MKh1307M Chromato-Mass-Spectrometer with an Oil–Vapor Evacuation System—A. É. Rafal'son, G. I. Afonina, I. I. Kirillova, and I. M. Shmushkevich 1443 154
Ultra-High-Vacuum Unit—F. M. Babenko, A. E. Yanov, N. N. Bagrov, and Yu. K. Kostin 1446 157
Automatic Low-Pressure Regulator—F. Ya. Lein 1449 160
Possible Causes of Failure to Discover Leakage in Tests for Vacuum-Tightness—L. A. Afanas'eva, I. G. Baryshnikova, A. I. Evlampiev, and L. E. Levina..... 1451 161
Investigation of the Working Characteristics of a Dissector in the Operating Mode of Counting Individual Light Quanta—A. P. Tashkun, I. V. Reznikov, S. S. Shushkevich, I. V. Pustynskii, and K. V. Mikhalkov 1453 163
Procedure for Counting Photons—I. A. Deryugin, A. T. Mirzaev, and E. A. Andreev 1457 166
Distribution of the Signal Amplitudes and Thermionic Noise in a Photomultiplier —I. S. Guk, A. N. Dovbnya, and A. S. Tarasenko 1459 168
Transit Effect in an FÉU-30 Photomultiplier—I. R. Gulakov, A. M. Lyutsko, and A. N. Pertsev 1462 170

Link between Multielectron Noise in Vacuum High-Voltage Photoelectronic Devices and the Pressure and Composition of Remanent Gases—É. A. Makh, I. N. Zaidel', and V. M. Vinogradov	1465	173
Investigation of the Threshold Characteristics of FÉU-28 and FÉU-62 Photomultipliers—T. A. Dem'yanova and V. I. Markov	1469	176
Photoelectric Instrument for Determining Light-Pressure Force Moments—L. A. Vasil'eva and S. S. Vasil'eva	1472	178
Thermostated Integrating Sphere for Measurements at Low Temperatures—M. Yu. Sakhnovskii and E. S. Smolinskii	1475	181
Continuous-Flow Ultraviolet Microdensitometer—L. B. Kaminir, É. Ya. Kreindlin, I. M. Undritsov, and L. S. Agroskin	1478	183
High-Current Arc Discharge for Pumping of Continuous-Wave Lasers Based on Ionic Crystals—A. I. Portnyagin and A. A. Shokin	1481	186
Fast Magnetokinetic Shutter—V. G. Kuchinskii and V. T. Mikhkel'soo	1484	189
Characteristics of Semiconductor Bolometers Deposited on a Quartz Substrate—Zh. A. Zaika and I. D. Konozenko	1487	191
Automatic Frequency Control of Two He + Ne Lasers and Frequency Fluctuations of the Difference Wave—V. A. Morozov, V. A. Sedel'nikov, and V. V. Tuchin	1489	192
Shielding of the Mirrors and Windows of Discharge Tubes from the Products of Electrode Disintegration—A. Ya. Leikin, A. I. Samoilovich, V. S. Solov'ev and L. Ya. Yaroslavtseva	1492	194
Powerful Ultraviolet Laser—V. I. Eremin, V. A. Kolosov, and L. V. Norinskii	1494	196
Single-Pulse Laser with Cascaded Multipliers and a Tunable Frequency Converter—V. M. Vakulenko, A. G. Ershov, L. P. Ivanov, L. S. Muratov, O. B. Cherednichenko, and G. A. Sharif	1496	197
Reduction of the Output-Power Fluctuations of a He + Ne Gas Laser—É. S. Voronin, Yu. A. Il'inskii, V. E. Prokopenko, V. S. Solomatin, and G. S. Starkov	1499	200
Modulation of Infrared Radiation at Piezoresonance in GaAs—Yu. V. Vorob'ev, V. N. Zakharchenko, and O. V. Tretyak	1501	202
Optimal Configuration of the Receiving Coils of a Vibration Magnetometer—K. M. Polivanov, E. I. Kalugin, and A. I. Krivaksin	1503	203
Self-Compensating Magnetometer with a Superconducting Solenoid—V. I. Sokolov	1506	206
Compensators of the Magnetic Field Nonuniformity of a Superconducting Solenoid—V. B. Nazarov, V. A. Zabrodin, I. S. Krainskii, and L. N. Gal'perin	1509	208
Peculiarities of the Optical Systems of Electronic Mirror Microscopes—N. N. Sedov, N. I. Labutin, and Ch. P. Volk	1512	211
The UÉG-150 High-Voltage Electron-Diffraction Camera—N. P. Levkin, N. V. Alekseev, P. P. Barzdain, and Yu. M. Kushnir	1515	213
Investigation of Raman Light-Scattering Spectra in Semiconductors—B. S. Umarov and L. K. Vodop'yanov	1520	217
Measurement of the Electrical Conductivity in High-Ohm Samples in Powerful Electric Fields by the Contactless Method—I. S. Levitas, L. M. Mogil'nitskii, Yu. K. Pozhela, and A. P. Sashchuk	1522	219
Installation for Ionic Doping—G. A. Kachurin	1525	222
Revealing the "Metallurgical" Boundary in Epitaxial Silicon $n-n^+$ and $n-n^\tau-p$ Structures—Yu. P. Boitsov and V. I. Prokhorov	1527	223
High-Voltage Vacuum Sectioned Insulator Made of Semiconductor Sitall—V. A. Ergakov, I. I. Kyukchkov, V. A. Korolev, V. A. Lapikov, and Yu. V. Trebukhovskii	1530	226
Monitoring a Gas Medium during the Growth of Silicon Carbide Crystals—Yu. M. Tairov and V. F. Tsvetkov	1533	229
Shape of the Crystallization Front during Crucible-Free Zonal Melting—Ch. V. Kopetskii and V. A. Marchenko	1536	231

Unit for Measuring the Absorption and Velocity Dispersion of Sound in a Magnetic Field at Low Temperatures—V. L. Beletskii, A. P. Korolyuk, and M. A. Obolenskii 1539 233
Cryostat for Investigating the Absorption of Ultrasound in Solids at Temperatures down to 0.32°K—A. G. Shepelev 1544 237
Superconducting Solenoid Having a Field of up to 90 kOe with a Transverse Working Gap—S. I. Goridov, L. S. Lazareva, and V. N. Morgun 1548 240
Properties of Welded Joints of Wires Made of the Alloys Nb+Zr+Ti and Nb+Ti—I. S. Krainskii and I. F. Shchegolev 1551 242

ABSTRACTS

Suppression of the Effect of Oscillations of Accelerator-Beam Intensity for Statistical Separation of the Yields of Nuclear Reactions Having Various Multiplicities—N. N. Balamatov, B. I. Goryachev, and V. N. Orlin 1554 245
Tank Circuits for Studying the Interaction of High-Frequency Fields with a Plasma in Linear Installations—I. S. Savchenko and I. R. Yampol'skii 1556 246
Semiconductor Si(Li) Beta-Spectrometer Having a Magnetic Trochoidal Electron Transporter—B. Bochev, V. V. Kamanin, F. Normuratov, Yu. Ts. Organesan, and V. G. Subbotin 1558 247
Automatic Scintillation Unit for Scanning Two-Dimensional Chromatograms with Tritium—V. M. Vdovenko, V. N. Bobrova, O. A. Rys'ev, N. A. Surov, A. V. Zharkov, and I. F. Ivanova. 1560 248
Luminous Compounds Based on Zinc as Tritium Detectors—V. M. Vdovenko, V. N. Bobrova, A. V. Zharkov, O. A. Rys'ev, and I. F. Ivanova 1562 248
Powerful-Field Solenoid with Water Cooling—B. K. Ratnikov 1563 249
Parameters and Construction of Commercial Electromagnetic Quadrupole Lenses—N. I. Doinikov, A. A. Korotkov, I. F. Malyshev, A. V. Nikiforovskii, A. V. Popov, B. V. Rozhdestvenskii, G.N. Samsonov, and N. A. Fadeev 1565 250

REVIEWS OF INSTRUMENTS

Attachment to the E12-1 Capacitance and Inductance Meter—M. S. Novikov, E. D. Rogach, and A. G. Sukiyazov 1567 252
Modulation Attachment to the S3-5 Deviometer for Measuring Small Capacitances—Yu. S. Nakonechnyi 1568 253
Improving the Reliability of Stabilized VS-22 Rectifiers—V. D. Gorin 1570 254
Stability of the Readings of Thermoelectric Vaccum Gauges to a Temperature Change—A. A. Birshert 1571 254
Attachement to the IKS-14A Spectrophotometer for Measurement of Specular-Reflection Spectra—Yu. I. Prokhorov 1574 257
Automatic Recording of a Variation of the Optical Characteristics of the Sample Using SF-10 and SF-14 Spectrophotometers—A. I. Sibilev and P. N. Moskalev 1576 258
Broadening the Working Spectral Range of the ORD-UV-5 Spectropolarimeter of the JASCO Firm to 2.3 μ—Yu. N. Chirgadze and S. Yu. Ven'yaminov. 1577 259
Preamplifier Based on a Field-Effect Transistor in the SRS-1-0 Scintillation X-Ray Counter—G. M. Murashko and N. V. Nikonenkov 1580 261
Magnetic Field Intensity Marker Pickup Based on the Automatic Pen Recorder of the RÉ-1301 Radio Spectrometer—A. Ya. Asinovskii and O. V. Nikitina 1582 262
Vacuum Attachment to the URS-50IM Diffractometer for Investigating Thin Films—V. F. Bochkarev and V. A. Egorov. 1584 263

NEW INSTRUMENTS

Precision Time-Code Converter with Vernier Interpolation—I. A. Malevich and A. F. Chernyavskii 1586 265
Instrument for Automatic Measurement of the Phase-Amplitude Responses of Four-Ports—G. A. Vitmaer, G. G. Krasikov, S. N. Popov, and K. M. Shul'zhenko 1586 266
Ion Mass-Spectral Microscope—Yu. P. Maifet and V. T. Cherepin 1587 267

ÉM-150 Electron Microscope – P. A. Stoyanov, É. A. Shulyak, and P. P. Barzilovich 1588 268
28-kOe Superconducting Solenoid Having a Working Aperture with a Diameter of 20 cm – B. V. Glasov, V. I. Kurnosov, V. A. Merzilikin, G. T. Nikolaev, and V. B. Yuferov ... 1589 269
Multiple-Strand Composition Superconductors – E. M. Savitskii, V. V. Baron, V. A. Frolov, V. N. Starkov, and P. A. Kochagin 1589 270
Cryostat Having a Warm Horizontal Aperture – A. G. Demishev and N. P. Nazarenko 1590 271
Metal Cryostats – A. G. Demishev, A. M. Kalyuk, and N. P. Nazarenko 1591 271

Volume 14, Number 6, Part 1 November-December, 1971

Computer Systems for Physics Research Centers (Review) – G. I. Zabiyakin and V. N. Polyakov 1593 5
Electrical Insulation in Electrostatic Analyzers (Review) – V. A. Ergakov, I. I. Kryuchkov, and Yu. V. Trebukhovskii 1607 20

NUCLEAR EXPERIMENTAL TECHNIQUES
Dielectric Strength of Accelerator Tubes – A. V. Almazov and F. F. Myntsov 1619 32
Separate Control of the Injector Heating and of the Current Amplitude in Transformer Accelerators – N. F. Goncharov and A. A. Egorov 1623 36
Investigation of Positron Spectra Obtained on a Linear 8-30 MeV Electronic Accelerator – I. G. Tarutin and V. I. Pilyavets 1625 38
Determining the Parameters of the Total-Absorption Peak – A. K. Gribkov 1629 41
Multichannel Modular Spectrometer for Low-Energy Electrons and Protons – O. L. Vaisberg, L. S. Zhurina, V. G. Kovalenko, É. L. Lein, B. V. Polenov, B. I. Khazanov, and A. V. Shifrin 1631 42
Low-Energy-Electron Spectrometer Having a Multiplate Analyzer – É. L. Lein, L. G. Ol'dekop, B. V. Polenov, A. P. Remizov, B. I. Khazanov, M. Z. Khokhlov, and A. V. Shifrin 1634 44
X-Ray Spectrometer Having a Cooled Si(Li)-Detector – R. D. Arl't, A. E. Banifatov, A. I. Kalinin, M. M. Petrov, and L. I. Tyvin 1638 48
Time Measurements with a Germanium Detector – Yu. K. Akimov, K. Andert, A. I. Kalinin, I. N. Churin, and V. N. Shuravin 1641 51
Compensation of the Drift of Charged-Particle Tracks in Wide-Gap Spark Chambers – K. M. Avakyan, R. B. Aivazyan, and É. M. Matevosyan 1645 54
Recording of Alpha-Particles by Solid Track Detectors Based on Cellulose – V. N. Bondarev, E. G. Korzin, and D. M. Parfanovich 1648 56
Characteristics of Charged-Particle Detection Sections Having Channel Electron Multipliers – V. G. Kovalenko and B. V. Polenov 1651 59
Miniature Low-Background Counters for Measurement of ^{37}Ar and ^{39}Ar – A. V. Fisenko and E. M. Kolesnikov 1654 62
Mössbauer Diffractometer Having High Angular Resolution – A. N. Artem'ev, K. P. Aleshin, R. M. Mirzababaev, V. V. Sklyarevskii, G. V. Smirnov, and E. P. Stepanov 1656 64
Determination of the Background of Mössbauer Transmission Experiments Using Iron Alloys with 3d-Transition Elements – V. A. Semenkin and Yu. A. Shevchenko 1659 67

ELECTRONICS AND RADIO ENGINEERING
Multichannel Device for Recording Digital Measurement Information – V. S. Ekaterinin, N. M. Zinov'ev, A. I. Kashcheev, and N. A. Obertalin 1662 70
Time-Sharing System for Compressing Spectrometric Data – V. I. Vinogradov, V. G. Muratov, and V. I. Petrova 1664 72
Ring Scaling Network – V. A. Avdeev and V. M. Kuznetsov 1669 76
Calculation of the Dead Time of High-Speed Amplitude Converters – M. E. Glushkovskii 1671 78

268 Application of Statistical Averaging in Order to Improve the Differential Linearity of a Time Analog-Digital Converter—V. G. Demenkov, Yu. S. Kulabukhov, 269 V. S. Nesterenko, and L. A. Timokhin 1676 83

Arkad'ev-Marx Generator in a Conducting Shield—I. M. Roife, E. V. Seredenko, 270 and B. A. Stekol'nikov 1681 87

271 Low-Inductance Generator Producing Pulses Having a Voltage of 500 kV at an 271 Energy of 5 kJ—O. G. Zagorodnov, I. I. Magda, N. P. Gadetskii, V. I. Belyaev, and Yu. V. Tkach 1684 89

Oscillator with Programmed Frequency Variation—V. I. Katkov, O. É. Rubin, A. M. Semiglazov, and A. P. Dolgovykh 1686 90

Compensation of Hysteresis in a Trigger with Emitter Coupling—I. A. Lednev, T. S. Proimin, and V. M. Tarasov 1688 92

5 Load-Current Commutator-Interrupter—B. A. Volkov 1690 94

Average-Pulse-Amplitude Meter—V. P. Selyutin 1693 96

20 Integrated Pulse Circuits Based on Avalanche Transistors—V. P. D'yakonov 1695

Broadband Power Amplifiers Based on Meter-Band Transistors—V. N. Galashenkov, 32 A. A. Golovkov, and A. B. Kraichik 1698 98 100

36

Volume 14, Number 6, Part 2 November-December, 1971

38

41 Frequency Spectrum Analyzer for a Single RF Pulse—I. S. Savchenko, V. A. Khorunzhii, V. A. Pis'menetskii, and G. I. Zverev 1701 103

Determination of the Differential Distribution Laws of the Interval between Fades 42 of Random Processes—E. G. Lebed'ko, G. A. Aver'yanov, A. S. Egorov, A. M. Romanov, and F. I. Khaitun 1704 105

Realization of the Combined Method of Analyzing Time Intervals on the Basis 44 of the Vernier Technique—I. A. Malevich and A. F. Chernyavskii 1707 108

Recording of Spin-Echo (Nuclear Magnetic Resonance) Signals in the Measurement 48 of the Selfdiffusion Coefficients of Liquids—I. S. Pronin 1710 111

Diode AC Switch for a Radiospectrometer—G. A. Novin'kov, I. N. Pleshkov, 51 and É. D. Azizov 1712 113

Low-Inertia Millimeter-Radiation Detector Based on n-InSb—V. M. Afinogenov 54 and V. I. Trifonov 1714 114

Automatic Streak Camera for Recording Lightning Flashes—E. N. Brago, B. N. Gordin, 56 and M. A. Peskin 1716 116

Consideration of Secondary Emission in the Vibrating-Probe Method—I. V. Lopatin 1718 118

Method of Indirect Measurement of Electrometric Parameters of Amplifiers Having 59 a Null-Selfstabilization Channel—V. V. Meer and P. V. Karmanov 1721 121

Transient Responses of the External Modulator of the Photocurrent of a Photomultiplier 62 —I. Z. Rutkovskii and N. N. Shavel' 1724 123

Stroboscopic Conversion Using a Photomultiplier—I. Z. Rutkovskii and N. N. Shavel' 1727 125

Measurement of the Volt-Capacitance and Transient Responses of Metal-Dielectric-64 Semiconductor Structures—V. A. Rozhkov, B. A. Panfilov, and A. M. Sverdlova 1729 127

Stabilized Power Supply for the DRSh and DKsSh Lamps—I. D. Bobrushkin, 67 L. V. Velichkin, L. V. Karklit, A. K. Savenko, and E. N. Tverdokhlebov 1731 129

GENERAL EXPERIMENTAL TECHNIQUES

High-Vacuum Sorption Aggregate for Radiation-Chemical Investigations—B. V. Maslov, 70 V. A. Gol'din, and L. M. Galich 1733 131

72 Crucible-Free Cathode-Ray Evaporator—L. N. Nemirovskii and L. A. Seidman 1736 133

76 Vacuum Spark Gap—Yu. S. Pavlov 1738 134

78

Intensification of the Brightness of Autoionic Images by an Image Converter —M. M. Butslov, A. F. Bobkov, M. K. Vlasov, N. D. Grishin, G. M. Kukavadze, B. Ya. Kuznetsov, A. L. Suvorov, and Yu. V. Terekhov 1741 137
Improvements of the Signal-to-Noise Ratio in Photomultipliers—V. V. Bacherikov, Yu. A. Makarov, and B. M. Stepanov 1746 139
Choosing One-Electron FÉU-79 and FÉU-64 Photomultipliers on the Basis of Their Ratings—A. N. Pertsev, I. V. Reznikov, and M. N. Suzin 1748 141
Laser Operating at the Wavelength 27.9 μ—A. V. Kukhta 1751 143
Time Characteristics of the Radiation of a Laser Based on Alumoyttrium Garnet with Neodymium for Continuous-Wave Operation—V. G. Dmitriev, L. M. Kuzina, Yu. I. Kulikov, and N. V. Shkunov 1753 145
Microsecond Light Sources Based on a Nitrogen Flashlamp—V. A. Naidenov 1757 148
Ultraviolet Pulsed High-Speed Light Generators for Exciting Bioluminescence —Zh. M. Ronkin and L. A. Stroganova 1759 150
Strip-Line Electrooptical Modulator for the Range up to 1 GHz—V. A. Voronin and N. Sh. Khaikin 1762 153
Combined Modulator and Light Divider for a Dual-Beam Spectrophotometer —A. I. Gorelik, A. V. Fal'tsman, and S. G. Shvedov 1765 155
High-Temperature Isothermal Quartz Vessel for Photographing the Infrared Spectra of Vapors—A. A. Mal'tsev and G. K. Selivanov 1767 157
Device for Creating a Pressure of up to 40 kbar at Temperatures of up to 1700°C —A. A. Godovikov, S. A. Smirnov, I. Yu. Malinovskii, É. N. Ran, M. S. Pan'kov, G. A. Rosinskii, and B. P. Tokmin 1769 159
Attachment to Electron Paramagnetic Resonance Spectrometers for Studying Substances under Hydrostatic Pressure—A. I. Filippov and Yu. V. Yablokov 1772 161
Attachment to a Standard Electron Paramagnetic Resonance Spectrometer for Investigations under High Hydrostatic Pressures—Yu. A. Timofeev, S. V. Kasatochkin, T. I. Alaeva, L. F. Vereshchagin, and E. N. Yakovlev 1776 164
High-Pressure X-Ray Camera—V. N. Alyamovskii, V. A. Kirkinskii, and B. A. Fursenko 1778 166
Variation of the Time Characteristics of Semiconductor Electron-Stream Amplifiers —V. B. Fedorov and V. V. Tsvetkov 1782 170
Investigation of Semiconductor Structures by the Method of Optical Probing —V. B. Glazman, V. F. Mikhailov, V. D. Saprykin, and I. I. Uvarov 1785 172
Determining the Concentration of Free Charge Carriers and the Concentration Profile in n-GaAs from the Faraday Effect—V. S. Abramov, Yu. A. Moma, and M. V. Nevskii 1788 174
Torsion Oscillator Having a Long Period and a Long Relaxation Time—V. B. Braginskii, V. I. Panov, V. G. Petnikov, and Yu. V. Khlyntsev 1791 177
Stable Superconducting Point Contact—F. Ya. Nad' 1794 179
Cryostat for the Investigation of Optical Absorption Under Uniaxial Compression —T. D. Dzhafarov and E. A. Rodkin 1796 181
Cryostat with a Pneumatic Device for Optical Measurements in the Far Infrared Region —L. K. Vodop'yanov and V. D. Kopanev 1798 182
Bellows Which Works by Twisting—V. A. Marichev 1800 184

ABSTRACTS

Observation of Double Resonance in the RYa-2307 Nuclear Magnetic Resonance Spectrometer —Yu. V. Belov, Yu. L. Kleiman, N. V. Morkovin, and Yu. Yu. Samitov 1802 186
Digital Frequency Synthesizer for a Proton Magnetometer with Continuous Measurement of the Magnetic Field Intensity—A. G. Gordienko, O. I. Gubernatorov, V. T. Pivovar, and R. M. Pivovar 1804 187
Thermal and Indicator Diagrams of a 16 kbar Hydraulic Compressor—E. V. Polyakov, L. F. Vereshchagin, and Yu. S. Konyaev 1805 187

	Engl./Russ.	
Use of High-Ohm Hole Silicon for Fabricating Detectors with a Surface-Barrier Junction – A. V. Protsenko, V. M. Korol', V. N. Sinitsyn, and E. L. Krasovskaya	1807	188
REVIEWS OF INSTRUMENTS		
Reflecting Attachment for an Infrared Spectrometer – D. M. Karpinos, S. P. Listovnichaya, and V. Ya. Aivazov	1809	190
Rotating Device for the RÉ-1301 Radio-Spectrometer – Yu. A. Malikov, V. P. Raevskii, and G. A. Tsintsadze	1811	191
NEW INSTRUMENTS		
Spectropir 5-01 Spectral-Ratio Pyrometer – I. L. Neguritsa	1813	193
